

2015 Hawaiian sea turtle stranding data¹

Shawn K. K. Murakawa

Protected Species Division, Marine Turtle Biology and Assessment Program
Pacific Islands Fisheries Science Center, NOAA Fisheries

Requesting Agency/Entity:

Julie Rivers

U.S. Navy

Purpose:

Requesting 2015 Hawaiian sea turtle strandings to determine if any unusual strandings event or increases in stranding rates may be attributed to Navy training and testing

Data Sources:

From where will the data be retrieved?

Oracle Turtle Data Processing System

Excel spreadsheet

Attached File:

PSD_MTBAP_DataRequest_USNavy_Rivers_2015HIStrandings.xlsx

The data are valid for one year from receipt and is non-transferable. If the data are needed after one year, another data request must be submitted. If you receive a request for the data, the person must contact me directly. Please use the internal report number when citing the data. Thank you.

FIELD	DESCRIPTION
Date	Date of stranding
Island	Main or northwestern Hawaiian island where the stranding occurred
Location	Place where turtle was found on the island
Latitude	Coordinates, in decimal degrees, of the location measured north or south
Longitude	Coordinates, in decimal degrees, of the location measured east or west
Sex	The abbreviation for the gender of the turtle (M = male, F = female, U = Unknown).
SCL	Straight carapace length measured in centimeters (cm) to the nearest 0.1, taken from the midpoint of the precentral/nuchal notch to longest point on shell (post central), not to the notch, using the metal caliper.
Cause of Stranding	Determination of probable most cause for the turtle to strand. If more than one cause is listed, the first one listed is of higher significance than the last one. (The cause is chosen from a set list.)
Human Induced	Whether or not a person or persons intentionally took the turtle for their benefit. (Unknown means that it is not known whether or not the information was collected or that the turtle was not examined to determine whether or not human take was involved.)
Hook	Whether or not a fish hook is embedded in the turtle. Unknown means that it is not verified whether or not a fishing hook is present.
Line	Whether or not fishing line is entangling the turtle. Unknown means that it is not verified whether or not fishing line is present.
Net	Whether or not a net is entrapping the turtle. Unknown means that it is not verified whether or not a net or trap (such as a crab or lobster) is present.
Boat Impact	Whether or not the turtle has been hit by a boat or propeller. Unknown means that it is not verified whether or not an impact by a boat or propeller occurred.
