

REVIEW FROM DAY 1

- **How do we best define Bio-Sampling ? What do we mean when we use the term Bio-Sampling ?**
 - Market sampling of lengths-weights by species
 - Life history sampling of otoliths, gonads, fin clips
 - Fisheries data collection and database holdings
- **Consensus on Priority Species for Life History Studies**
 - For selection of new species, what criteria should the Pacific Regions be guided by ?
 - For future stock assessment needs: which species by region ?

REVIEW FROM DAY 1

- **How do we alleviate the life history sample preparation bottleneck ?**
 - Farm out more work to outside Contractors ?
 - Extend the role of sample prep to Bio-Sampling teams ?
 - Strategic reduction in sample size preps while minimizing loss in precision of parameter estimates ?
- **Human Dynamics Components**
 - Best practices in gaining trust and respect with industry ?
- **Sampling & Data Integrity - “Checks and Balances”**
 - Are they being applied similarly across the 3 regions ?
 - How much have protocols changed over time ?
